

HG CCTV upgrade

COST EFFICIENT UPGRADING TO IP BASED CCTV

Analogue matrix based CCTV systems have become obsolete, with spare parts no longer available. Keep your crew safe and avoid off-hire by upgrading to a modern, IP based server solution today!

Key Features & Benefits

- Improved functionality with advanced view layouts, split screens and camera groupings
- Access CCTV pictures on mobile devices via the vessel's Wi-Fi
- Affordable recording functionality
- Flexible number of camera inputs and monitor outputs
- Standard PC/server-components in the system
 - extending system lifetime
- Affordable solutions with scalable cost - keep existing cameras now; upgrade to IP cameras when it suits you

Scope of Delivery

- Removal of existing analogue matrix, keyboards and monitors
- Keep existing analogue cameras and camera power supply
- New IP CCTV server with Milestone CCTV software
- New CCTV PC Clients (control stations)
- New CCTV monitors
- New analogue to IP video converters (fixed or PTZ)
- New Cat.6A cabling between CCTV server and CCTV PC Clients
- New Cat.6A cabling between CCTV clients and overhead monitors on bridge
- Reuse of other cabling according to agreed specification
